Each class 9:00 am to 4:00 pm Attend one or both classes.

Large discounts for attending both classes See discount prices below.

Why two different titles?

With 50 different states, it is impossible to have one term that will work for them all. Some states you might be able to use the term addictions, while others require you to use the term habits. There are negative habits that produce a minor disruption in one's life. Other habits have actually caused deaths.

Nationally, about 72% of adults report one or more unhealthy behaviors.

There are over 20 types of chemical addictions or negative behaviors. There are over 25 types of nonchemical addictions or negative behaviors. Professional hypnotists realize that there are times that they may need to refer clients to other licensed professionals. To ensure ongoing success, there is a USB drive included with the class. This USB will cover promotional material and exact techniques. Everything is written for you. Don Mottin has hypnotized over 50,000 clients. He knows what works and what does not work.

What you will learn

- * Using Metaphors
- * Regression for rapid changes
